SKILLS

- **Languages:** Java, C++, C
- **Frameworks:** Node.js, Next.js
- **Tools/Platforms:** NeonDB, MongoDB, AWS, Docker
- **Soft Skills:** Adaptability, Critical-Thinking, Accountability

PROJECTS

Vide Code Editor | GitHub — Mar' 26

- Engineered a browser-native AI Web IDE enabling real-time full-stack execution through in-browser containers.
- Composed an IDE with editor, terminal, and file system supporting multi-framework workflows.
- Embedded local LLM-powered coding assistance delivering intelligent code completion and debugging insights.
  Tech Stack: Next.js, TypeScript, Monaco Editor, WebContainers, Ollama (LLMs), NextAuth, MongoDB, TailwindCSS, ShadCN UI, xterm.js

ClipScale: AI Powered SaaS | GitHub — Feb' 26

- Built an AI-powered SaaS enabling image/video upload, compression and optimization with customizable aspect ratios.
- Orchestrated secure authentication and session management using Clerk for protected user access.
- Crafted a responsive UI and deployed the platform on Vercel with CDN-backed delivery.
  Tech Stack: Next.js, Clerk, NeonDB, Cloudinary, Tailwind CSS, DaisyUI

Authentication System | GitHub | Live — Jan' 26 – Feb'26

- Developed a full-stack authentication system using Next.js API Routes, MongoDB, JWT, and bcrypt for secure signup, login, and protected profile access via httpOnly cookies.
- Integrated token-based email verification and password reset workflows to enable secure account activation and recovery.
- Strengthened access control with validation, centralized error handling, and modular API design for scalable, secure authentication.
  Tech Stack: Next.js, React.js, MongoDB, JWT, bcrypt

Serverless Event Registration System — Mar' 25 – Apr' 25

- Architected a serverless event registration system automating attendee management using AWS Lambda, DynamoDB, and API Gateway.
- Implemented role-based access control with AWS IAM and real-time validation using a Python backend, achieving **85%** data accuracy.
- Designed a responsive frontend enabling seamless API integration and real-time user feedback.
  Tech Stack: AWS Lambda, DynamoDB, API Gateway, IAM

CERTIFICATES

Java (Basics) | HackerRank — Oct' 25
Advanced Computer Networks | NPTEL — May' 25
Introduction to Hardware and Operating System | Coursera — Sep' 24

ACHIEVEMENTS

Achieved 3-Star rating in Problem Solving on HackerRank — Feb' 26
Secured 2nd place among 80+ participants in a competitive AWS-based technical challenge at Lovely Professional University. — Apr' 25
Secured AIR 2413 / 300,000+(Top 0.8%) participants in a national weekly coding competition on Unstop. — Feb' 25

EDUCATION

Lovely Professional University — Phagwara, Punjab
Bachelor of Technology, Computer Science and Engineering; **CGPA: 8.29** — Aug' 25 – Present

R.B College — Samastipur, Bihar
Intermediate, PCM; **Percentage: 83.00%** — Mar' 20 – Mar' 22

Rose Bud Academy — Khagaria, Bihar
Matriculation, **Percentage: 88.40%** — Mar' 19 – May' 20
